

# Second to none

We work  
for your success

TEBBE

STRONG. FAST. PRECISE.

TEBBE

# All our know-how for those who carry responsibility day and night

## Planning success

Machines by TEBBE stand for failure-free, efficient and continuous operation.

▶ 1 billion hectares

of land across the globe  
are processed with TEBBE  
machines.

Performance and efficiency. Every day. This is what modern agricultural operations demand from their machines. The time windows within which farmers and contractors can spread manure and harvest crops keep on getting shorter, which is why they demand high-performance machines that are and remain operational whenever needed. TEBBE manufactures agricultural machines that are unrivalled in the market with respect to power, reliability and durability.

How do we do this? We know the agricultural sector inside out. We listen to our customers. And we use this practical know-how to completely satisfy your requirements. This is why the sector opts for our solutions. Anyone who buys TEBBE knows that they are getting the best, most powerful and well-designed product of its time.

And the results have been evident on your fields for more than 60 years.

#### Sowing success

Each of our solutions  
is a product of TEBBE's  
huge expertise.

We use **all our know-how**  
to build uncompromisingly  
good machines

# 0.8 g / m<sup>2</sup>

Precision  
spreading

To build machines that benefit the agriculture sector, you have to know a lot and be capable of a whole lot more. TEBBE has the necessary expertise, from the planning stage through to design and final assembly of your effective and powerful agricultural machine. We only trust our own engineers, technicians and skilled workers to carry out these process steps. The collective know-how of our entire team goes into each technical solution and every detail of the design.

A combination of know-how and technical skill is the basis for all product advantages and what makes customised solutions possible, because spreaders from TEBBE are considerably more precise with higher spreading throughput capacities than comparable machines on the market. This is why TEBBE is the world leader in the market for spreader bodies for self-propelled work machines. In brief: TEBBE knows agricultural equipment inside and out.

**Harvest success**

Premium products by  
TEBBE contribute to high  
yields every day.

Nobody who works in or for the agriculture sector wants to leave things to chance, which is why planning security is a top priority. We at TEBBE offer you planning security in the shape of superior products: because nothing is more reliable than our spreaders, interchange systems, customised machines and silage-trailers.

60 years of experience has taught us how to build machines that deliver precisely what you need. As a manufacturer, we keep on learning and continuously improve the performance of our products. Where others are spending time addressing weaknesses, we can concentrate on enhancing efficiency. This is typical of our approach: we learn from experience, for ourselves and also for our customers, today and in the future. Machines that already meet the demands of tomorrow – this is what we call perfect planning security.

Our **experience** from the past  
60 years – for excellent results  
today and tomorrow

TEBBE  
SPREADERS

TEBBE  
SILAGE-  
TRAILERS

## SPREADERS

Aggressive shredder beaters in TEBBE spreaders guarantee a high throughput capacity and optimum shredding. The spreaders ensure even and precise distribution of the spreading material, and the conical spreader adapter speeds up the loading and unloading process.

### Spreader types

MS 130	TS 120	LS 120 E	DS 140
MS 140	TS 160	LS 120 T	DS 160
MS 240	TS 240		DS 180
HS 120	HS 180	HS 200	HS 220
HS 240	HS 320	HS 420	

## SILAGE-TRAILERS

Silage-trailers from TEBBE allow even the most powerful forage harvesters to run at maximum capacity. The chopped material is placed onto the trailer in perfect doses. And, thanks to an optimum setup, 40 m³ of chopped material can be unloaded in less than 60 seconds.

### Silage-trailers types

ST 450	ST 500	ST 550
--------	--------	--------

# > 650 model variations

## TEBBE CUSTOMISED MACHINES

## TEBBE INTERCHANGE SYSTEMS

### CUSTOMISED MACHINES

TEBBE is Europe's market leader for self-propelled work machines and various carrier vehicles. The combination of a lorry with a spreader and attached low-loader with an excavator guarantees fast and independent work processes on roads and fields.

#### Bodies

Customised bodies

### INTERCHANGE SYSTEMS

Interchange systems from TEBBE are highly efficient – even when the equipment pool is small. Dual-action cylinders allow the spreader body to be exchanged rapidly. And, thanks to the low deadweight of the body unit, the machines remain highly manoeuvrable even on soft ground.

A strong partner – worldwide

**TEBBE is available to agriculture sectors across the globe thanks to **our strong partner network** in all corners of the world: Your hotline to perfect service**

Visit [www.tebbe-landmaschinen.de](http://www.tebbe-landmaschinen.de) and find out what we can do for you and your harvest!

---

# Your hotline to perfect service

---

## Our **spare part service** – so that your machine always runs like on the first day.

The excellent spare part service at TEBBE is a real safety factor for our customers. We keep all 'regular' parts directly on stock for you. These are, of course, original spare parts of components that were used to construct the machine. Replacement of these parts means that your machine is as good as new and up and running again very quickly; the same also applies for machines of older series.

We can also supply all spare parts that do not come from our own production facility, for instance tyres, in a very short time. We only employ experts in our spare parts team who have in-depth know-how about the machines and who are able to localise and identify required parts precisely and accurately – bundled competence and reliability.

---

## The **service hotline** – for nonstop access to absolute performance.

In the event of a problem, TEBBE will not keep you waiting! We have set up a fault hotline for our customers to provide immediate telephone support – even if you are out on the fields. Our contact partners are experts in the mechanics and electronics of all machines. The majority of the inquiries can be solved on the phone. Also, there is a standby service at the weekends, meaning that we are available to you every day.
